PREFACE

This book is intended to provide a guide for students to understand and analyse academic genres in scholarly writing because academic discourse is structured according to specific conventions. Thus, understanding and mastering the conventions enables them to effectively communicate their ideas, engage with their disciplinary communities, and contribute meaningfully to knowledge sharings and discussion.

This tutorial book on genre analysis is designed to guide students in recognizing, analyzing, and applying genre-based writing strategies, particularly in research article writing. The book provides theoretical foundations and practical approaches to understanding the rhetorical structures and communicative purposes of research articles.

Each chapter is structured to introduce key concepts and description, provide examples, and offer exercises that encourage students self learning. By engaging with the materials in this book, learners will develop critical reading skills, enhance their writing competence, and gain confidence in producing academic texts that adhere to disciplinary expectations.

Through this preface, I would like to express my gratitude to my wife and kids to ignore some times togetherness with because of completing this book.
